

# Introducing the AIPGF

The only framework dedicated to guiding governance of AI in projects

## What is the AI Project Governance Framework (AIPGF)?

<b>Structured framework</b>	Guides ethical, efficient and effective AI use in projects and programmes.
<b>Integrated approach</b>	Complements existing methods like Agile, PRINCE2®, PMBOK® and hybrid approaches.
<b>Practical orientation</b>	Helps project leaders balance AI-related benefits with risks.

## Why is the AIPGF Important?

1. AI adoption and automation in projects and programmes is accelerating.
2. Without governance, organisations face project failure, financial loss, and reputational damage.
3. The AIPGF provides a practical solution to embed AI tools in projects responsibly.

**The AIPGF is your blueprint for the future of human-AI project collaboration.**

How mature is the governance of AI use in  
**YOUR** projects and programmes?
