

# AI Project Governance Framework (AIPGF) & AI Governance Professional (AIGP)

Feature	AIPGF Certifications (Foundation & Practitioner)	AIGP Certification
<b>Focus</b>	Framework-based certification evidencing ability to practically integrate AI governance in projects & programmes.	Information-based certification evidencing broad knowledge of developing, integrating and deploying AI systems in line with relevant laws and policies.
<b>Purpose</b>	To provide tangible, actionable guidance on governing ethical, efficient and effective use of AI in projects and programmes.	To provide general guidance on establishing, managing, and maintaining a responsible, ethical and legal AI governance programme across an organisation.
<b>Scope</b>	Project-Centric: Focuses on how to use AI responsibly throughout the project life cycle, integrating with existing project methodologies and tailored to varying contexts.	Macro-level (Organisational & Regulatory): Focuses on the AI lifecycle, legal obligations (like the EU AI Act), risk management and ethical implications at a corporate level.
<b>Target Audience</b>	Project and Programme Managers, PMO professionals, strategic project oversight roles and teams governing or providing assurance about AI use in projects and programmes.	AI Governance, Risk and Compliance Professionals, Data Protection Officers, Legal/Policy staff, and anyone setting enterprise-wide AI governance strategy.

How mature is the governance of AI use in  
YOUR projects and programmes?
